

ESSEX FIELD CLUB Visit our Discovery Gallery
Recording and sharing natural history since 1880

The County's Natural History Society ***We invite you to join us***

The Essex Field Club is the society for wildlife enthusiasts and people with an interest in the natural history and geology of Essex. The biological recording county of Essex includes the London boroughs east of the River Lea, as well as small portions of administrative Cambridgeshire and Suffolk.

Outdoor meetings all year round for young and old alike.

All members and visitors are welcome at meetings but are requested to notify leaders in advance in case there are alterations

Fungus Forays

Learn to tell your Death Cap from your Waxcap and contribute to our knowledge and the conservation of fungi

Help with current surveys

When did you see your first bumblebee this year? First dates each year provide useful information. We help coordinate data collected.

Your home and garden

We need to know more about resident wildlife such as spiders, ladybirds and stag beetles.

Canvey Mammoth tooth

The **Essex Field Club** has serious interests in geology, flowering plants, fungi, mosses, lichens, mammals, reptiles and amphibians, insects (e.g. beetles, butterflies, moths, flies, bugs, dragonflies, bees and wasps), and other invertebrates (e.g. spiders, snails and slugs), and values both amateur and professional members.

We offer members and visitors about 30-40 meetings a year, regular information through our Newsletters and an annual scientific publication, the Essex Naturalist.

- The Club's Recorders compile, maintain and verify the primary biological database for the county.
- The Club has a key role in nature conservation and the support of the Essex Biodiversity Action Plan.
- We compile, maintain and publish Red Data lists for the county.
- We promote the publication of natural history guides, surveys and scientific work for Essex.
- The Club incorporates specialist mammal, bird, invertebrate, flowering plant, fungi and geology groups.

We hold an **annual exhibition and social** in early December. This is open to all and is an important occasion for Essex naturalists and anyone interested in wildlife or geology to meet and swap news and ideas.
